

DuraTech™ I-Bar

PVC Grating

by *poolequip.com*™

DuraTech™ PVC I-Bar sets the standard for perimeter panel gutter grating. I-Bar offers strength, durability, and high flow rate to help maximize your gutter performance.

DuraTech I-Bar grating combines a safe walking surface with maximum wave capture design making it ideal for pools that operate for recreation and competition purposes. I-Bar grating is manufactured in the USA using the highest quality U.V. and chemical resistant PVC materials available and can be custom fabricated to meet any pool dimensions required.

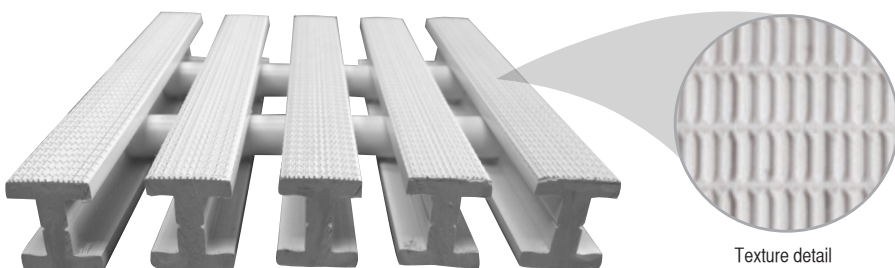

Benefits of I-Bar Grating

- Made with 100% virgin exterior grade, impact-resistant PVC resin for superior strength and resistance to harsh pool chemicals.
- Integral slip-resistant texture is embossed into the grating's top surface as a standard safety feature.
- Formulated with maximum U.V. inhibitors for colorfastness and resistance to harmful sunlight.
- Tested for load and deflection per ASTM D790-10.
- Can be fabricated for perpendicular or parallel installation.
- Custom configurations, radius bends and various designs are available.
- While white is the standard DuraTech color, other colors are available upon request.
- DuraTech Grating comes with a 10 year warranty.

DuraTech™ Grating Styles

DuraTech Grating is manufactured by Poolequip, a division of RenoSys Corp.

Texture detail

Technical Data

Width of I-Bar top	3/4"
Maximum gap between bars	3/8"
Open area per sq. ft.	31.25%
Grating height	1"
Deflection 300 lbs. at 18" per ASTM D790-10	3/16"
Standard cross rods (Other spacing avail. upon request)	8" on center
