

DuraTech™ Deck Drain

by poolequip.com™

The DuraTech™ Deck Drain system is specifically designed to remove water from pool decks in any aquatic environment. The deck drain channel is made from thick, exterior grade, high impact PVC resin and is rigid enough to withstand the busiest pool deck. To minimize field labor, custom channel lengths are available. Modular interlocking grating makes installation and maintenance a snap.

The interlocking grating comes embossed with an anti-skid top surface that provides superior traction while still being comfortable underfoot. The deck drain channel and grating are integral colorfast products with maximum UV inhibitors to resist cracking, fading and discoloration. The system comes with a 10 year warranty, meets federal ADA guidelines and is proudly made in the USA!

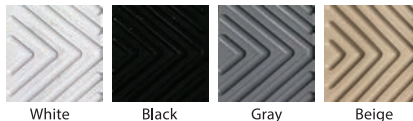

Modular interlocking grates allow easy access to any part of the drain system.

30% thicker profile over similar drains.

Only DuraTech has embed wings that prevent separation from surrounding concrete.

Extra wide base provides stability during installation.

Also available in custom colors to match your pool's perimeter grating.*
*minimum order applies

Technical Data

Channel width I.D.	4"
Channel height	4"
Channel lengths	10' or 20'
Open area per sq. ft.	37.5%
Grating height	1"
